

# MD. SHAHRIAR BIN MOHSIN

Surrey, BC, Canada | +1 (778) 915-4109 | shahriarbm@gmail.com | linkedin.com/in/sbmsoikot

## PROFESSIONAL SUMMARY

---

AI/ML and data professional with 10+ years of experience building intelligent systems, modernizing data platforms, and translating complex technical capabilities into business outcomes. Currently consulting on AI/ML engineering for enterprise clients, with hands-on experience in generative AI, LLM applications, ML lifecycle, and modern data stacks (Microsoft Fabric, Azure Databricks, Snowflake, dbt). Strong foundation in data engineering, BI, and product management across enterprise SaaS, telecom, and consumer technology, with executive stakeholder experience and a track record advising government on AI adoption. Master of Science in Data Analytics Engineering from Northeastern University; AWS Certified ML Engineer – Associate and AI Practitioner.

## CORE COMPETENCIES

---

**AI and ML Engineering:** Generative AI and LLM applications, retrieval-augmented generation (RAG), prompt engineering, model fine-tuning, ML model development and deployment, MLOps, evaluation and monitoring, AI agent design, intelligent automation workflows.

**Cloud and Data Platforms:** AWS (SageMaker, Bedrock, Lambda, S3), Microsoft Fabric (Lakehouse, Warehouse, OneLake, Data Factory), Azure Databricks, Snowflake, dbt, Delta Lake, medallion architecture, AWS data services.

**Languages and Tools:** Python (pandas, scikit-learn, LangChain, PyTorch), SQL, PySpark, REST APIs, Git, Azure DevOps, CI/CD for data and ML workflows.

**BI and Analytics:** Power BI, Tableau, Plotly, dimensional modeling, semantic layers, DAX, KPI design, A/B and hypothesis-driven analysis.

**Leadership and Delivery:** Cross-functional leadership, executive and CXO engagement, AI strategy and adoption advisory, Agile/Scrum, vendor and partner management, mentoring, technical documentation.

## PROFESSIONAL EXPERIENCE

---

**AI/ML Engineer Consultant** | NeuNov Technologies, Vancouver, Canada *May 2026 – Present*

- Consulting on AI and machine learning engineering projects for enterprise clients, scoping use cases, designing solutions, and partnering with client teams on delivery.
- Building LLM-enabled applications using retrieval-augmented generation, prompt engineering, and agent workflows to automate knowledge-heavy business processes.
- Developing and deploying ML models on AWS (SageMaker, Bedrock, Lambda) with attention to evaluation, monitoring, and responsible AI practices across the model lifecycle.
- Advising client leadership on AI strategy, build-versus-buy decisions, and roadmap prioritization, translating technical trade-offs into business language for executive audiences.

**Data Engineer Consultant** | Allied Global (Daxko Account), Remote *Nov 2025 – May 2026*

- Modernized legacy SSIS ETL pipelines into dbt models on Snowflake for a multi-product SaaS analytics ecosystem, applying medallion architecture across bronze, silver, and gold layers.
- Worked with Microsoft Fabric (Lakehouse, Warehouse, Data Factory) and Azure Databricks for data preparation and orchestration as part of the on-premises to cloud migration roadmap.
- Translated legacy business logic into transformation specs and SQL/Python models, documenting data contracts, lineage, and quality tests for downstream product and reporting teams.
- Partnered with business analysts, product owners, and platform engineers to align data architecture with reporting needs, governance standards, and cost-management considerations.

**Product Leader** | Nitto Digital Service and Analytics, Dhaka

*Jul 2018 – Sep 2023*

- Designed and launched AI-powered automation and intelligent alerting solutions for telecom network operations, combining rules and decision logic to cut average incident resolution time by roughly 35% and improve SLA compliance.
- Directed end-to-end development of B2B SaaS and digital platforms, including a paperless digitization platform for the RMG sector used by global apparel buyers and local suppliers to manage orders, samples, and production milestones.
- Led integration of payment gateways and partner APIs so suppliers and SME partners could transact on the platform, working with vendors and internal engineering on contract terms, technical scope, and rollout.
- Designed and delivered AI and automation training and consultation programs for government organizations under a national capacity-building project, building curriculum and running workshops for senior officials on AI adoption strategy, big data, and cloud computing; advised industry leaders and policymakers on AI-enabled service delivery and digital transformation roadmaps.
- Ran weekly demos and quarterly reviews with client executives and internal CXO sponsors, translating delivery progress into business KPIs and surfacing trade-offs for prioritization.

#### **Co-Founder and Product Leader** | Fordo, Dhaka, Bangladesh

*Jul 2018 – Jul 2021*

- Co-founded and launched a consumer mobile application for personal data and spending analytics, implementing AI-driven analytics and recommendation logic to deliver personalized insights based on user behavior and consumption patterns.
- Led partner onboarding and API integrations across financial, retail, and social platforms; secured investor funding and scaled adoption through structured rollout plans.
- Owned UX direction end to end: ran user interviews, built wireframes, tested four major iterations of the core flow, and shipped changes that lifted 30-day retention by about 40%.

#### **Solution Manager / Product Manager** | Huawei Technologies, Dhaka, Bangladesh

*Aug 2005 – Jul 2018*

- Managed a portfolio of four product lines for a country-level account hitting US\$100M annual sales in two consecutive years; won and delivered a US\$150M network modernization program for Orascom Telecom Bangladesh, coordinating an in-country delivery team of 200+ engineers.
- Sponsored early analytics-driven network optimization initiatives where traffic and quality-of-service data informed product planning and capacity decisions; recognized with Huawei's Global Gold Medal.

#### **Database Engineer** | Grameenphone Ltd. (Telenor), Dhaka, Bangladesh

*Dec 2003 – Sep 2004*

- Built internal tools in VB6 and SQL Server for the customer service team, streamlining data lookups used daily in call handling.

## **EDUCATION**

---

**Master of Science, Data Analytics Engineering** — Northeastern University, Vancouver, Canada

**Master of Business Administration, Finance** — East West University, Dhaka, Bangladesh

**Bachelor of Science, Computer Science and Engineering** — Asian University of Bangladesh, Dhaka, Bangladesh

## **CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT**

---

- AWS Certified Machine Learning Engineer – Associate, AWS Training and Certification (2026)
- Diploma in AI Applications, Northeastern University (Dec 2025)
- AWS Certified AI Practitioner, AWS Training and Certification (Sep 2024)
- Applying AI Technologies to the Workplace, Northeastern University (Sep 2024)
- Digital Transformation, Boston Consulting Group (Aug 2021)
- Entrepreneurship, Harvard Business School (Sep 2018)
